

European Union Grants Advisor Aquasoft (Czech Republic)

Training Grants Package Provides the Key to Greater Business Agility for SMEs

"We don't offer the same solution for everyone. We approach our customers individually, creatively, and professionally. Our aim is to deliver tangible benefits to our customers by harnessing the power of new technology. But we can only do this if our employees' knowledge and skills set is up to date. We needed to investigate funding opportunities to help us carry out our training objectives."

Dagmar Mrkosová, HR Director, Aquasoft

Situation

Aquasoft, an independent software vendor based in Prague, provides information system integration for private and public sector clients in more than 900 locations across the Czech Republic. It wanted to better respond to client needs and to provide training opportunities for its 100 employees in IT education, management skills, personal management, finance, and English language skills.

Solution

Aquasoft applied for the European Union Grants Advisor (EUGA) programme, through which they were able to take advantage of a streamlined application process for EU funding.

Benefits

- The employee training facilitated by the EUGA programme enhanced the company's overall business agility and the confidence of the individual employees.
